GLOBAL FUNDING

(Non-working-cum-working)

A Global Queue

When you activate 10 levels by sponsoring 10 people or purchasing them for \$100, you enter a global queue.

Each 10-level activation places you in a new global queue:

- 10 levels activated → Enter Global 10
- 20 levels activated → Enter Global 20

It continues up to 50 levels.

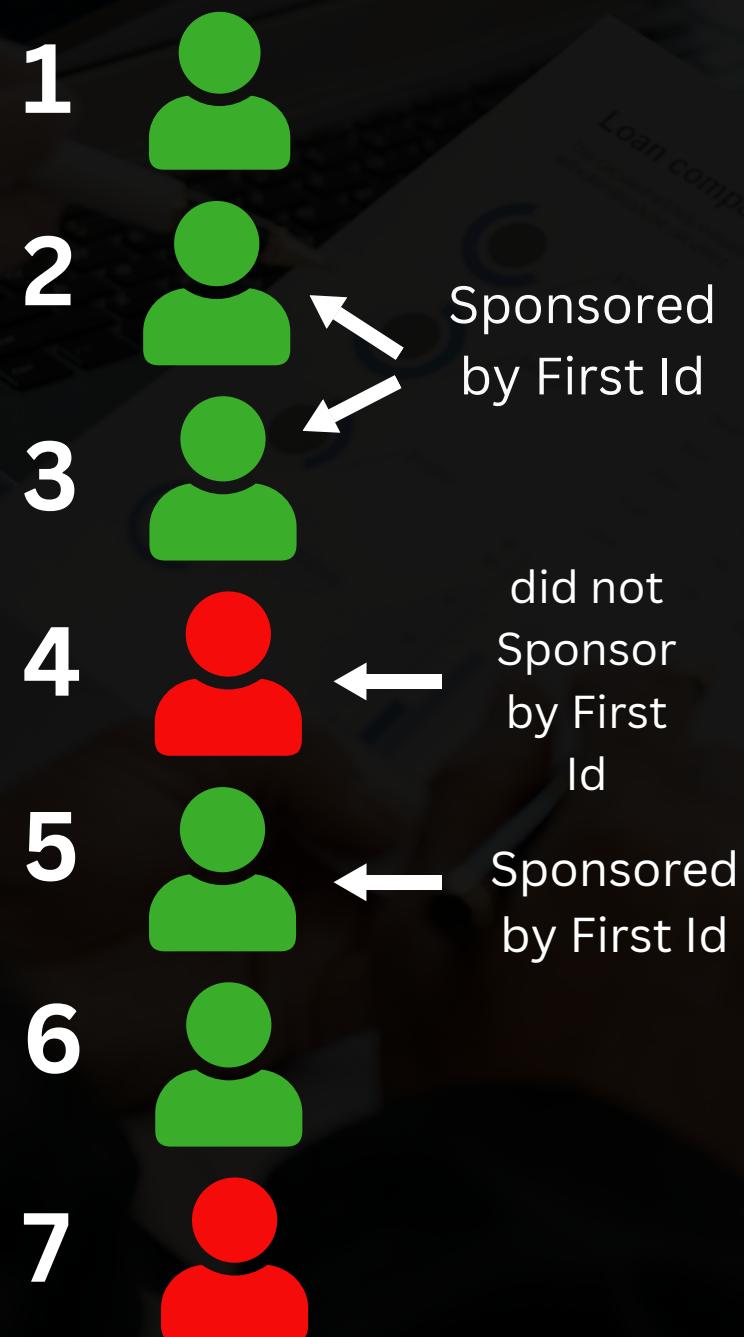

YOU EARN FUNDS FROM A DEPTH EQUAL TO THE NUMBER OF LEVELS YOU HAVE ACTIVATED.

GLOBAL 10	GLOBAL 20	GLOBAL 30	GLOBAL 40	GLOBAL 50
10	20	30	40	50
LEVELS	LEVELS	LEVELS	LEVELS	LEVELS
ACTIVE	ACTIVE	ACTIVE	ACTIVE	ACTIVE

A SINGLE-LEG QUEUE: EACH USER WHO ACTIVATES 10 LEVELS JOINS AT THE BOTTOM OF THE QUEUE.

GLOBAL QUEUE

Global Queue

The Global Queue is a single-leg queue where users who activate their 10 levels join at the bottom. When a user upgrades, 50% of their earnings are given to their sponsor. If no sponsor is found above in the queue, the 50% is transferred to their immediate upline.

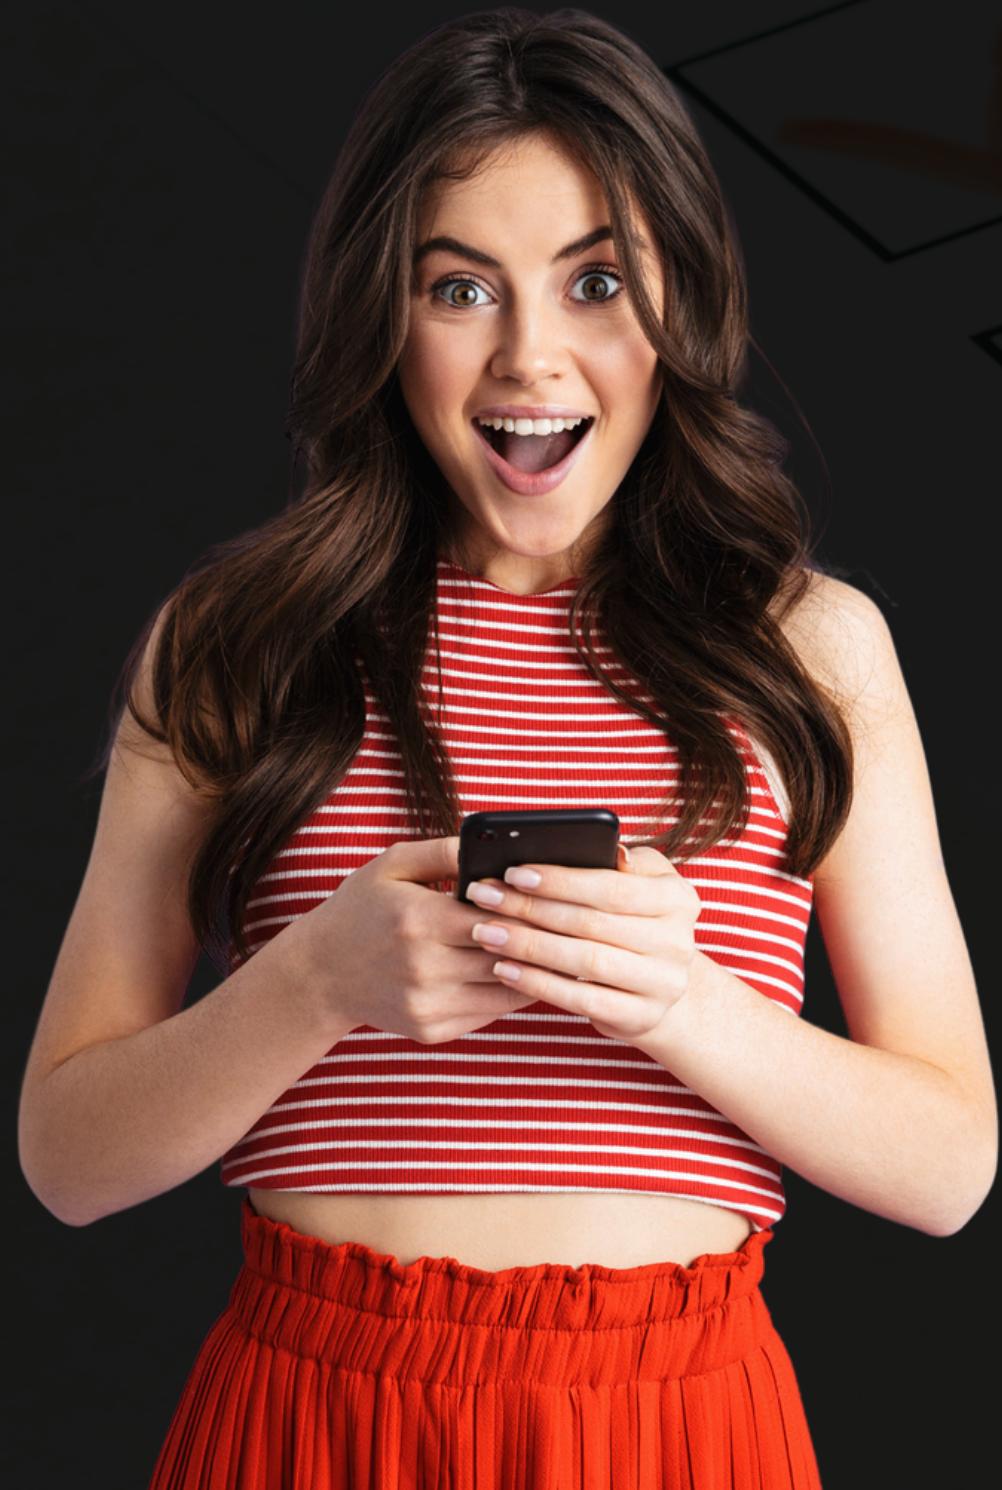

For example: In the Global Queue, the ID in position 1 (green) sponsors the IDs in positions 2 and 3 (also green). The ID in position 4 (red) is not sponsored by position 1. If the 4th ID earns, 50% of their earnings will go to the 3rd ID, as there is no direct upline of forth. If the 3rd ID earns, 50% goes to the 1st ID, as That is the sponsor. Similarly, if the 5th ID earns, 50% will go to the 1st ID, bypassing positions 2, 3, and 4. This pattern remains consistent across all Global Queues.
